Core TSOs update Core Publication Tool

Amsterdam, Berlin, Bucharest, Budapest, Bratislava, Brussel, Dortmund, Ljubljana, Luxembourg, Paris, Prague, Vienna, Warsaw, Zagreb April 20th 2022

The Core Flow-Based Day-Ahead Capacity Calculation project (Core FB DA CC) parties would like to inform market participants that an update to the Core Publication Tool has been released yesterday, including a new version of the Publication Handbook.

This release fixes the following data inconsistencies:

- Validation Reductions:
 - CNEC name and TSO naming issue
 - Display information on returned branch
- D2CF: correction for BE-DE
- Max Net Positions: add DE + Alegro Hubs
- Pre-final + final computation: Fref, init & Fnrao
- LTN: some borders show blanks instead of zero's

Furthermore, the release contains an updated structure of the post-coupling pages. In terms of publication of post-coupling data during the EXT // run, please note that:

- No data is available for historical business days. The resulting net positions and prices from the market coupling simulations can however be consulted through the csv files published on LINK;
- There is a lead time of ~3 weeks before the post-coupling information for a certain business day becomes available;
- Calculation of congestion income and the increase / decrease step on the initial ID ATCs are not performed during the EXT // run and hence there will be no data until go-live. For ID ATCs only the initial values will be published;
- The API's will become available the 21st of April.

The following functionalities are deferred to a next release:

- Automatic monitoring tool for data completeness
- Implementation of the Extended LTA inclusion approach in the Core Market View page

Communication channels

Questions in relation to the Core FB MC project in general, the publications of the day-ahead Core Flow-Based Capacity Calculation inputs and outputs, as well as market coupling simulation results can be raised on the Q&A forum: <http://coreforum.my-ems.net/>

Market participants that would like to follow the project development closer, are invited to join the Core Consultative Group (CCG) by sending an email to CoreCG@magnus.nl. The participants of the Core Consultative Group will receive regular information and invitations to teleconferences and meetings.

Best regards,
Core TSOs
