## Core TSOs update the Core Publication Tool

*Amsterdam, Berlin, Bucharest, Budapest, Bratislava, Brussel, Dortmund, Ljubljana, Luxembourg, Paris, Prague, Vienna, Warsaw, Zagreb* May 26<sup>th</sup> 2022

Following up on the previous communication, the Core Flow-Based Day-Ahead Capacity Calculation project (Core FB DA CC) parties would like to inform market participants that an update to the Core Publication Tool (<https://core-parallelrun-publicationtool.jao.eu>) for the parallel run has been released on May 26<sup>th</sup> 2022.

More specifically, this release introduces the “Automatic monitoring tool for data completeness” through the page <https://core-parallelrun-publicationtool.jao.eu/monitoring> as introduced during the Core CG meeting of Jul 7<sup>th</sup> 2021.

A backfill of the monitoring tool has been performed on best effort basis starting from Dec 13<sup>th</sup> 2020: due to continuous evolutions of the Core tooling since the start of the external parallel run some historical data might be missing.

### **Communication channels**

Questions in relation to the Core FB MC project in general, the publications of the day-ahead Core Flow-Based Capacity Calculation inputs and outputs, as well as market coupling simulation results can be raised on the Q&A forum: <http://coreforum.my-ems.net/>

Market participants that would like to follow the project development closer, are invited to join the Core Consultative Group (CCG) by sending an email to [CoreCG@magnus.nl](mailto:CoreCG@magnus.nl). The participants of the Core Consultative Group will receive regular information and invitations to teleconferences and meetings.

Best regards,  
Core TSOs
