**QUESTION 03 | YES OR NO**

Would you also like to have the opportunity to bid for 15 minutes MTU and 60 minutes Block bids products at the CH borders?

Block bid is indivisible, it cannot be partially selected. The quantity (in MW) and price should be the same for all the periods on which the block bid spans. The block bid should span on consecutive time periods: - One single set of consecutive hours, if the auction is set up with 60min MTU - One single set of consecutive 30-minute intervals, if the auction is set up with 30min MTU - One single set of consecutive 15-minute intervals, if the auction is set up with 15min MTU
