

[CWE Flow-Based Market Coupling] Changes in External Constraints for the Dutch bidding zone.

Dear Market Participants,

From business day Wednesday the 4th of June onwards, TenneT TSO B.V. will adapt the default External Constraint value for both import and export from 4250 MW to 5000 MW for the Dutch bidding zone. This change is restricted to the 8th hour up to the 24th hour on working days. For the remaining hours the default External Constraint value will remain at 4250 MW. To allow this adaptation for the business day on the 4th of June the change will be prepared from the 2nd of June onwards in the supporting IT-systems.

Best regards

TenneT TSO B.V.
